42.707 Cost-sharing rates and limitations on indirect cost rates.

(a) Cost-sharing arrangements, when authorized, *may* call for the contractor to participate in the costs of the contract by accepting *indirect cost rates* lower than the anticipated actual rates. In such cases, a negotiated *indirect cost rate* ceiling *may* be incorporated into the contract for prospective application. For *cost sharing* under research and development contracts, see <u>35.003(b)</u>.

(b)

- (1) Other situations *may* make it prudent to provide a *final indirect cost rate* ceiling in a contract. Examples of such circumstances are when the proposed contractor-
- (i) Is a new or recently reorganized company, and there is no past or recent record of incurred *indirect costs*;
- (ii) Has a recent record of a rapidly increasing *indirect cost rate* due to a declining volume of sales without a commensurate decline in indirect expenses; or
- (iii) Seeks to enhance its competitive position in a particular circumstance by basing its proposal on *indirect cost rates* lower than those that *may* reasonably be expected to occur during contract performance, thereby causing a cost overrun.
- (2) In such cases, an equitable ceiling covering the *final indirect cost rates may* be negotiated and specified in the contract.
- (c) When ceiling provisions are utilized, the contract shall also provide that-
- (1) The Government will not be obligated to pay any additional amount *should* the *final indirect cost rates* exceed the negotiated ceiling rates, and
- (2) In the event the *final indirect cost rates* are less than the negotiated ceiling rates, the negotiated rates will be reduced to conform with the lower rates.
