

TAB C Instructions

Reporting: the Army must collect, consolidate, and report commercial cloud spending as directed in the HQDA EXORD 009-20, 'Army Data Plan Implementation in Support of Cloud Migration', and subsequent fragmentary orders.

Implementation: To achieve this objective, the Enterprise Cloud Management Agency (ECMA) implemented the Technology Business Management (TBM) taxonomy with associated General Services Administration Product Service Codes (PSCs) and Contract Line-Item Numbers (CLINs) to provide more accurate and comprehensive reporting of cloud investments. See Appendix HH, TAB A for the TBM taxonomy. Additionally, cloud requirements owners shall include the applicable Performance Work Statement (PWS) language and ensure all cloud-related requirements and resulting contract action(s) implement the Army's Common Cloud Contracting Language. See Appendix HH, TAB B for the mandatory PWS language.

TAB A - TBM Taxonomy

- (1) Identify the cloud activity (e.g., migrating to the cloud, new software development in the cloud, etc.)
- (2) Based on the cloud activity, use the assigned TBM tower and PSC to enable clear mapping of the requirement to an appropriate CLIN
- (3) NOTE: the cloud activity will be used as the CLIN name

TAB B - Army's Common Cloud Contracting Language

- (1) Using the same cloud activity identified in TAB A, locate the corresponding 'Cloud Activity/CLIN Name' in Columns C - F. - For example, if the cloud activity in TAB A is 'Migrating to the Cloud' - you would reference TAB B, Column C "1a) Migrating to the Cloud".
- (2) Follow the direction in Columns C - F to include the applicable PWS language (see Column B) for the specific cloud activity. - For example, "Column C - Migrating to the Cloud" requires the PWS language in Column B/Row 6 "The Contractor shall maintain all data within the legal jurisdiction of the United States IAW DFARS 239.7602-2(b)."
