11.301 Policy.

(a) Agencies *must* not require *virgin material* or *supplies* composed of or manufactured using *virgin material* unless compelled by law or regulation or unless *virgin material* is vital for safety or meeting performance requirements of the contract.

(b)

- (1) When acquiring *products* other than *commercial products* as defined in <u>2.101</u>, agencies *must* require *offerors* to identify used, *reconditioned*, or *remanufactured supplies*; or unused former Government *surplus property* proposed for use under the contract. These *supplies* or property *may* not be used in contract performance unless authorized by the *contracting officer*.
- (2) When acquiring commercial products, the contracting officer must consider the customary practices in the industry for the product being acquired. The contracting officer may require offerors to provide information on used, reconditioned, or remanufactured supplies, or unused former Government surplus property proposed for use under the contract. The request for the information must be included in the solicitation, and to the maximum extent practicable must be limited to information or standards consistent with normal commercial practices.

(c)

- (1) When the *contracting officer* needs additional information to determine whether *supplies* meet minimum *recovered material* or biobased standards stated in the *solicitation*, the *contracting officer may* require *offerors* to submit additional information on the recycled or biobased content or related standards. The request for the information *must* be included in the *solicitation*. When acquiring *commercial products*, limit the information to the maximum extent practicable to that available under normal commercial practices.
- (2) For *biobased products*, agencies *may* not require, as a condition of purchase of such *products*, the vendor or manufacturer to provide more data than would typically be provided by other business entities offering *products* for sale to the agency, other than data confirming the biobased content of a product (see 7 CFR 3201.8).
