

C-12 LPTA - Sample Evaluator Write-Up

Describe the Evaluation Process in the Source Selection Plan - Then Fully Document the Evaluation in Accordance With the SSP

Use a checklist or evaluation form such as the one below:

FACTOR 3: Usability

SUBFACTOR 3.2: Setup and Breakdown

OFFEROR:

RFP No:

Instruction to Offeror

The offeror shall setup its radar system for test to the point of data recording. After completion of the test, the Offeror shall breakdown its system and return the system to its pre-setup state.

Evaluation Criteria

The government will evaluate the offeror's radar system setup and breakdown. To receive an acceptable rating, the Offeror must demonstrate all of the below items:

- a. The system must be transportable by a two person carry.
- b. The system must be setup, broken down and operated by one person.
- c. The offeror must set up its radar system within a time not to exceed one hour using one person and break down its radar system within a time not to exceed one hour using one person.
- d. Cable connectors connect and disconnect using no more than one turn, or other quick-disconnect system.
- e. When the radar system antenna is mounted on the tripod, the range of motion must be +90 degrees to -10 degrees in elevation (horizontal is 0 degrees) and 360 degrees azimuth, without antenna removal.

Acceptable Standard of Proof

- * The system is transportable by a two person carry; and is setup, broken down and operated by one person.
- * The offeror sets up its radar system within a time not to exceed one (1) hour using one person, and breaks down its radar system within a time not to exceed one (1) hour using one person.
- * Cable connectors are quick to connect and disconnect using no more than one turn, or other quick-disconnect system.
- * When the radar system antenna is mounted on the tripod, the range of motion is +90 degrees to -10 degrees in elevation (horizontal is 0 degrees) and 360 degrees azimuth, without antenna removal.

Unacceptable

Not clearly meeting the requirements required to be acceptable.

Acceptable

Unacceptable

Evaluation Criteria: The Government will evaluate the offeror's radar system setup and breakdown.

To receive an acceptable rating, the offeror must demonstrate all of the below items:

- a. The system must be transportable by a two person carry.
- b. The system must be setup, broken down and operated by one person.
- c. The Offeror must set up its radar system within a time not to exceed one hour using one person and break down its radar system within a time not to exceed one hour using one person.
- d. Cable connectors connect and disconnect using no more than one turn, or other quick-disconnect system.
- e. When the radar system antenna is mounted on the tripod, the range of motion must be +90 degrees to -10 degrees in elevation (horizontal is 0 degrees) and 360 degrees azimuth, without antenna removal.

Evaluation narrative write-up below provides an example of both 'Acceptable' and 'Unacceptable' proposal responses:

Standard of Proof

Narrative:

Acceptable: The offeror proposed a system that can be transported by two people (page 12); can be setup, broken down, and operated by one person (page 13); and can be assembled and disassembled in less than one hour (45 minutes) (page 14). The offeror's approach uses cable connectors that connect and disconnect using only one turn and the range of motion of the radar system antenna is +90 degrees to -10 degrees in elevation and 360 degrees azimuth (page 22).

Unacceptable: The offeror proposed a system that can be transported by two people (page 12); can be setup, broken down, and operated by one person (page 13); ***however, the system cannot be assembled and disassembled in less than one hour (90 minutes, as stated in the offeror's proposal in Volume 1, page 16). Based on the evaluation criteria, this is unacceptable and results in the entire factor being unacceptable.*** The offeror's approach uses cable connectors

that connect and disconnect using only one turn and the range of motion of the radar system antenna is +90 degrees to -10 degrees in elevation and 360 degrees azimuth (page 22).
